Research Interest

#rai-research, Human-Centered AI, Human-AI Interaction Risks, Social AI, AI Ethics, Cognitive Science

Education

Georgia Institute of Technology Atlanta, United States

- *Ph.D. in Human-Centered Computing* (GPA: 4.0/4.0) *Aug 2023 – May 2028 (Expected)*
- *M.S. in Computer Science* (GPA: 4.0/4.0) *Oct 2024 - May 2026*

Tsinghua University Beijing, China

- *B. Eng. in Industrial Engineering, focusing on Human Factors* (GPA: 3.9/4.0) *Aug 2019 – Jun 2023*
- *Minor in Psychology* (GPA: 4.0/4.0)

Selected Publications

[1] **Lingqing Wang**, Yingting Gao, Chidimma Lois Anyi, and Ashok Goel. *Futuring Social Assemblages: How Enmeshing AIs into Social Life Challenges the Individual and the Interpersonal.* Proceedings of the 2026 CHI Conference on Human Factors in Computing Systems (CHI'26)

🏆**Best Paper Honorable Mention Award**

[7] Dilruba Showkat, Angela D. R. Smith, **Lingqing Wang**, Alexandra To. *"Who is the right homeless client?": Values in Algorithmic Homelessness Service Provision and Machine Learning Research.* Proceedings of the 2023 CHI Conference on Human Factors in Computing Systems (CHI 2023)

Awards & Honors

- Future Leader, ACM AI Leadership Summit *2026*
- Student Government Association Conference Fund *2026*
- Special Recognition for Outstanding Review (CHI'26, IUI'26) *2026*
- Tech to Teaching Certificate *2026*
- Doctoral Consortium, Summit on Responsible Computing, AI, and Society *2025*
- Five Stars Volunteer of Tsinghua University (highest honor) *2022*
- Tsinghua University Scholarship for All-Around Abilities (highest honor) *2020-2022*

Research Experience

Georgia Institute of Technology (Design Intelligence Laboratory, DILab) Atlanta, United States

Advised by Professor Ashok Goel *Aug 2023 – Current*

Futuring Human-AI Social Assemblages

- Used co-design and speculative design to explore how different social AI roles affect interpersonal relationships, and provided relation-based design implications (paper [1]).
- Conducted online in Prolific to examine different social AI design paradigms' impacts on users' interpersonal dynamics, responsibility attribution, and trust with a mixed method approach.
- Investigated reported relational risks caused by social AI usage in online communities.

Explainable AI (XAI) in Everyday Settings

- Explored end-users' perspectives on embedding XAI into their daily AI application scenarios using mixed-method: thematic analysis on open-ended data (paper [2]) and quantifying the effects of XAI design properties recommended in current literature (paper [3]).

Georgia Institute of Technology (Creating Ethics Infrastructures Lab) Atlanta, United States

Advised by Professor Richmond Wong *Aug 2025 – Current*

Participatory Policy Making for Responsible GenAI Integration in Higher Education

- Initiated collaboration with the Center for Teaching and Learning (CTL) at Georgia Tech to examine instructors' regulation of GenAI in the classroom and policy-making strategies (in submission).
- Developed toolkits to facilitate the instructional team and the students in making classroom AI policy collaboratively and to cultivate social norms to engage with AI responsibly in learning.

Northeastern University (The Art + Design Department) Remote

Advised by Professor Alexandra To *Jul 2022 – Sep 2022*

Transformational Game to Foster Machine Learning Bias Literacy

- Designed and evaluated a board game to facilitate ML bias literacy and ethics discourse of ML applications in job searching for higher education students (paper [4]).

Systematic Literature Reviews for Homelessness

- Conducted a systematic literature review within the context of the homeless population to examine the unintended harm against vulnerable communities through technology (paper [7]).

University of Illinois at Urbana-Champaign (Social Computing Systems Lab) Remote

Advised by Professor Yun Huang *Mar 2022 – Sep 2022*

Safety Risks and Safety Designs in Social Virtual Reality (VR) Platforms

- Investigated user experience with safety risks in social VR using mixed methods to provide design implications for building safe and inclusive 3D virtual worlds in the future (paper [6]).

Community Involvement:

Reviewer

- CHI 2025-2027; IUI 2026, 2027; DIS 2026; CSCW 2025; Creativity & Cognition 2025

Student volunteer

- DIS 2025

Mentorship

- Mentoring master's students conducting academic research in DILab

Talk

- **Guest Lecture,** CS 8001 - Human-Centered LLM Seminar, Georgia Tech *April 2026*
- **Guest Lecture**, LMC 4813 - Values & Ethics Digital Media, Georgia Tech *Feb 2026*
- **Speaker**, AAAI Spring Symposium Series 2025, San Francisco *April 2025*

Skills:

Programming: R, Python, SPSS, JavaScript, HTML, CSS, LaTeX, SQL, etc.

Research Method: Mixed Methods, Participatory Design, Interview, User Experiment Design, Statistical Analysis, Diary Study, Focus Group, Survey, Thematic Analysis, Ethnography, Prototyping

Language: English (Working Proficient), German (Conversational), Mandarin (Native).
